

Benefits of UC Deployments for **Government Offices**

With modern VoIP phone systems, there are three different deployment options. Learn more about each offering to decide which would be the best fit for your government office:

On-Premise

Offers more options for system customization

Allows a higher degree of technical control over network

Enjoy the flexibility & cost-savings of third party & legacy integrations

Lower long-term cost of ownership

Cloud

Low up-front cost with a monthly payment model

Easy multi-site & remote worker connectivity

Provider handles system updates & maintenance

Simple to scale up or down, adding or removing users as needed

Virtualization

Consolidates multiple applications on fewer servers

Immediate deployment

Most cost-effective solution for facilities already maintaining a virtual environment
